- Georgia Institute of Technology highlights BI Capture™ for Autism Awareness Month
- CEO and CRO are published for autism research
- Clinical Director for Education comes aboard
- CT technology introduced at leading conferences
- BBC America features TalkAutism

SUMMER 2007 SHAREHOLDER HIGHLIGHTS

Georgia Tech highlights BI Capture™ for Autism Awareness Month

The Georgia Institute of Technology and NBC Atlanta highlighted Caring Technologies' products as marketable solutions in an autism-centered TV spotlight. [<click here for article w/ video>](#)

CT CEO and CRO are published in Autism Research Online

Caring Technologies' CEO Ron Oberleitner and Chief Research Officer Dr. Gregory Abowd wrote an article, "The Importance of Record-keeping", which was published in the Interactive Autism Network's website. Mr. Oberleitner is an advisor to IAN, which is a \$2.3 million, leading internet-mediated research initiative sponsored by Autism Speaks.

Dr. James Ball comes aboard as Clinical Director for Education

Dr. James Ball, chair of the Professional Advisors for the Autism Society of America, has joined the company to educate clinical leaders in the educational community and promote BI Capture. Dr. Ball is the former head administrator of a large regional autism school system in New Jersey, a renowned international speaker, and well-published in the field of autism and technology.

CT technology introduced at leading conferences

As BI Capture and CT's online health record solutions are being readied for their primary markets, CT clinical champions are being hosted at leading international conferences for behavior and autism. Being held in New Jersey, San Diego, Sydney (Australia), and Oslo (Norway), these gatherings feature TalkAutism products being presented as new enabling technologies for professionals and individuals with autism.

BBC America features TalkAutism

TalkAutism.org, Caring Technologies' channel into the autism market, was recently featured on BBC America (TV channel and website) as a free resource for families and professionals to connect and seek help. Web traffic and site usage surged to record highs with this national exposure, which follows recent promotion from CNN.com and other news outlets.
